

Description

The Supra C500 is a highly secure Police preferred mechanical push button key safe, with space enough to hold up to six keys. The large twist and pull open handle has a unique clutch mechanism, which prevents forcing the safe open if the user enters an incorrect code.

It is Secured by Design (Police approved specification) and achieves - LPS1175 Issue 8 A5 certificate 1062g LPCB security rating. This accreditation is recognised by Secured by Design's Police preferred specifications and leading home insurance companies. When installed as directed it is as attack resistant as a domestic front door. It comes supplied with a weather cover, 4 x wall tapping screws, that do not need wall plugs, and a 5 year guarantee against manufacturing faults - which applies when installed and

used as intended.

Please note that the unit must be installed into brick or dense concrete to ensure the police accreditation.

Secured by Design Approved
